1. This communication is in response to Applicants' Amendment received on 9 July 2003. Claims 1 – 30 are pending in this application.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The closest prior art of record shows:

(1) A method and apparatus for key management scheme for internet protocols (Aziz, US 5,588,060A);

(2) Key agreement and transport protocol with implicit signature (Vanstone et al US 5,889,865A);

(3) Enhanced cryptographic system and method with key escrow feature (Sudia US 5,850,451A);

(4) Recursive key schedule cryptographic system (Busby US 4,776,011);

(5) Method of public key cryptography that includes key escrow (Wertheimer et al US 5,920,630A);

(6) Method and apparatus for a secure multicast transmission (AT&T Corp., EP 0 994 600 A2);

(7) Efficient, secure multicasting with minimal knowledge (Sun Microsystems, Inc., EP 0 952 718 A2);

(8) Guaranteed Partial Key – Escrow (Micali, Sylvio; Laboratory for computer science, MIT August 1995);

(9) Verifiable Partial Key Escrow (Bellare, M; Goldwasser, S; Proceedings of the Fourth Annual Conference on Computer and Communications Security, ACM, 1997);

(10) Alternatives to RSA: Using Diffie-Hellman with DSS (Cylink Corporation Resources).

3. Applicant's set of claims consists of claim 1-30.

4. Independent claim 1 is directed at a method for securely establishing communication in a multicast group of nodes. This claim identifies the uniquely distinct feature of registering and generating, with an event server a group session key for establishing the multicast group, where the group session key has been encrypted in a first message. Because nothing in the prior art appears to teach or suggest such a group session key, independent claim 1 and its dependent claim 2 – 9 are deemed allowable.

5. Independent claim 10 is directed at a communication system for creating a plurality of secure multicast groups in a network. This claim identifies the uniquely distinct feature of registering and generating, with an event server a group session key for establishing the multicast group, where the group session key has been encrypted in a first message. Because nothing in the prior art appears to teach or suggest such a group session key, independent claim 10 and its dependent claim 11-18 are deemed allowable.

6. Independent claim 19 is directed at a computer system functioning as an event server and for establishing multiple secure multicast groups. This claim identifies the uniquely distinct feature of generating a group session key being updated by the use of

a change password protocol to modify an object corresponding to the events in the directory. Because nothing in the prior art appears to teach or suggest such a group session key, independent claim 19 and its dependent claim 20-25 are deemed allowable.

7. Independent claim 26 is directed at a computer-readable medium carrying one or more sequences of instructions for establishing communication in a multicast group of nodes in a network. This claim identifies the uniquely distinct feature of registering and generating, with an event server a group session key for establishing the multicast group, where the group session key has been encrypted in a first message. Because nothing in the prior art appears to teach or suggest such a group session key, independent claim 26 and its dependent claim 27-30 are deemed allowable.

8. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

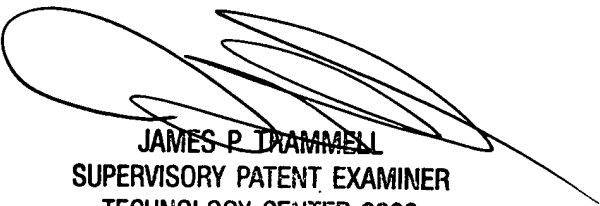

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina O Sherr whose telephone number is 703-305-0625. The examiner can normally be reached on Monday through Friday 8:30 to 5:00.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703-305-9768. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
